

MATHEMATICS & APPLIED SCIENCES MATHEMATICS

Flint, April 14th, 2022

Dear Cason,

CONGRATULATIONS!

The Mathematics faculty have selected you as a recipient of the 2022-2023 Caldwell Mathematics Award. This prize is given annually to the student(s) who, in the view of the faculty, has most prominently demonstrated excellent academic achievements in the mathematics program, and holds excellent potential to be successful in his/her career as a mathematician.

We are all very aware of the unique hardships undergone by students whose college trajectories coincided with the years spent navigating the COVID pandemic, and so we are especially proud of the work you've accomplished over your time here. This award comes with a number of small tokens of our appreciation – first, we hope to convene a lunch with this year's winners some time before the end of the semester. Please let me know if you're interested and which days of the week a lunch trip would work. Second, the faculty has selected an award of some mathematics books as a gift, which we'll present at the lunch (or some other time if you can't make lunch). Finally, we'll be adding your name to our plaque of award recipients that will be displayed in the hallway of 4th floor MSB.

All the faculty in the Department is very proud of your success, and are glad to count you amongst our graduates. We look forward to seeing what you do next.

Sincerely,

Cameron McLeman
